

TO WHOSOEVER IT MAY CONCERN

August 19th, 2014

M/S SOLPWER (INDIA) PVT LTD has installed X-Plate equipment on one of our Kilns.

We have observed over a period of one month that after the installation of X-Plate equipment there is a reduction in gas consumption by 2 to 3 %.

No negative effects observed on kiln performance or product quality.

We appreciate the new technology and looking forward to continuing our working relationship in the future.

Best regards,

Ravindra Bohra

President (Operations)
